

# UL-INT-MW3

## AC1200 MESH WIFI SYSTEM

**Dual Band  
WiFi**

**App  
Configuration**

**Parental  
control**

## FABS

The Ultra-Link Mesh Router System uses the latest mesh technology. The Mesh network system uses multiple, smaller nodes (routers), the nodes within your house will pick up the wireless signal and then boost and extend the WiFi coverage to the area where the nodes are placed. With the Ultra-Link Mesh Router System, you can simply and easily configure using the Ultra-Link WiFi Booster App which allows you to block unauthorized users with a single tap and supports Parental Control to help your children surf the internet safely.

### Whats in the box?

- Power adapter
- Ethernet cable
- Installation Guide

## NETWORKING RANGE

## SPECS

<b>Wifi Coverage:</b>	100-200 M
<b>Firmware Upgrade:</b>	Online User Blocking
<b>Node Dimentions:</b>	90 X 90 X 90mm
<b>DNS Support:</b>	Set DNS server manually

<b>Ports:</b>	2 Ethernet Ports Per Mesh Node
<b>Antennas:</b>	2 X 3dbi Internal Dual-Band Antennas
<b>Security:</b>	Mixed WPA/WPA2-PSK(Default)

### Setup Requirements:

Mobile Device Running Android 4.0+ Or Ios 8+

### Setup Supported:

PPPOE / STATIC IP/ DYNAMIC IP/ BRIDGE MODE

### Primary Mesh Node:

WAN+LAN, Both nodes will act as Lan Ports On additional mesh nodes

**SUPPORTS NETWORK OPTIMIZATION & AUTOMATIC ROUTING SELECTION.**
